

The Leading Light in LED Phototherapy

Dermalux® LED Phototherapy

Dermalux® LED Phototherapy is a non-invasive treatment that harnesses the power of pure light to naturally stimulate skin rejuvenation and resolve problem skin conditions for the face and body.

MULTI AWARD WINNING TREATMENT

Voted 'Treatment of the Year' for two consecutive years, Dermalux® has quickly become a must have treatment for skin care professionals due to its proven results, universal appeal, versatility, and unrivalled commercial benefits. This coupled with our specialist knowledge, training and customer support has enabled us to become the market leader in LED Phototherapy.

Dermalux® LED systems feature patented technology and are designed and manufactured in the UK.

CLINICALLY PROVEN RESULTS

LED Phototherapy is a clinically proven treatment that has long been known for its regenerating and anti-inflammatory properties. Utilising the latest generation Light Emitting Diode technology, Dermalux® delivers evidence based Red, Blue and Near Infrared wavelengths at the optimised output, intensity and dose with excellent results for a wide range of cosmetic and dermatological skin conditions.

SAFE AND COMFORTABLE

Unlike more invasive procedures that work as a result of the body's response to trauma, Dermalux® offers a non-invasive, pain free and relaxing treatment option which is suitable for all skin types and conditions without downtime.

- Skin Rejuvenation
- Acne and Problem skin
- Rosacea
- Pigmentation
- Psoriasis
- Accelerated Healing

Clinically Proven Wavelengths

Dermalux® systems use only clinically proven wavelengths delivered at the optimised energy output, intensity and dose enabling effective photobiomodulation of targeted cells with proven results.

Dermalux® LED Red 633nm

Dermalux® Red 633nm naturally stimulates skin rejuvenation. It is clinically proven to increase the body's natural form of cellular energy (ATP) which in turn "kick starts" cells to regenerate faster. Red light is potently absorbed by fibroblasts increasing the synthesis of collagen and elastin for smoother firmer skin. It also stimulates blood circulation and lymphatic systems to eliminate toxins and accelerate healing. The visible effects post treatment are in most cases immediate; skin feels hydrated and plump and radiance is restored.

- Increases collagen and elastin synthesis
- Reduces fine lines
- Improves skin tone and texture
- Increases natural hydration
- Improves microcirculation
- Restores radiance

Dermalux® LED Blue 415nm

Dermalux® Blue 415nm has powerful antibacterial properties and offers effective treatment for all grades of acne without irritation. Exposure to blue light at 415nm interacts with the p.acnes bacteria creating a photodynamic reaction which results in bacterial destruction. It also helps to reduce sebum production and improve skin clarity. Applied in combination with Red and Near Infrared light, the Tri-Wave treatment is excellent as a post treatment procedure to guard against infection, reduce inflammation and accelerate healing.

- Powerful anti-bacterial action
- Treats all grades of Acne
- Help to regulate sebum production
- Calming effect for problem skin

Dermalux® Near Infra-Red 830nm

Dermalux® Near Infrared 830nm works synergistically with Red light for optimum rejuvenation results. It is the most deeply absorbed wavelength targeting the inflammatory process cells to accelerate tissue healing and reduce scarring. NIR has a powerful anti-inflammatory effect building strength and integrity for sensitive conditions such as acne, rosacea and psoriasis. It is also clinically proven in the treatment of hyperpigmentation and aids penetration of topical products through increased cell permeability.

- Advanced regenerating treatment
- Powerful anti-inflammatory action
- Reduces redness and irritation
- Improves pigmentation
- Aids vascular repair
- Relieves pain

Dermalux Concurrent Modality Treatment (CMT™)

Dermalux® uniquely enables all three wavelengths to be delivered as either individual treatments or simultaneously to target multiple indications in each session. This offers a more bespoke approach, extends the range of treatment options available and ensures superior results with reduced treatment time.

- Targets multiple indications in one session
- Works at a molecular, cellular and tissue level
- Accelerates and enhances results
- Enables bespoke treatment programmes

Pure Light – Pure Profit

Dermalux® is recognised as one of the most profitable and indispensable treatments. A treatment for everyone all year round, Dermalux® has universal appeal and creates the foundation for all client skin care programmes to increase frequency of visits, client loyalty and satisfaction and provide competitive advantage.

UNRIVALLED PROFITABILITY

One of the highest profit treatments available, Dermalux® is affordable for clients, offers excellent revenue opportunities with new treatment options and brings additional income from existing treatments. No consumables or maintenance, this is safe, simple and results driven treatment with an exceptional return on investment.

SIMPLE AND VERSATILE

Dermalux® offers a wide range of applications both as a standalone treatment and in combination with existing skin treatments to enhance and accelerate results. The 20 minute Dermalux® Photofacial protocol has made it a popular 'drop in' treatment and clients can safely be left alone to relax whilst having a Dermalux® session.

TRAINING AND SUPPORT

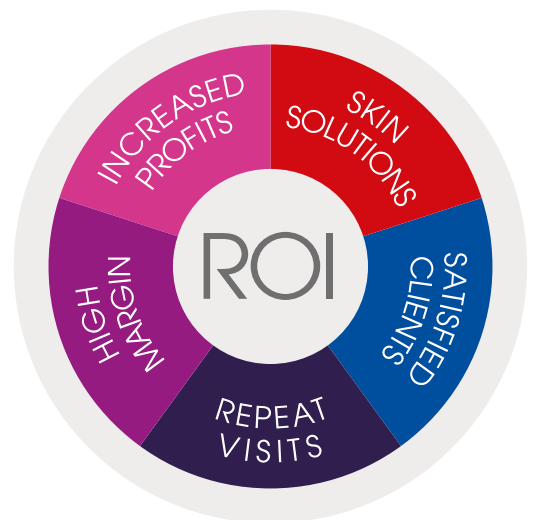

As a Dermalux® client, you will receive our expert on-site training package including a comprehensive training manual and protocols which covers the theory, commercial and practical aspects of the treatment. Our ongoing support service means that we are always available to offer knowledge and advice whenever you need it.

MARKETING TO YOUR CLIENTS

To ensure a rapid ROI and on-going success with the Dermalux® treatment, we provide a range of client marketing material and exciting promotional events to introduce Dermalux® to your clients. We also offer bespoke protocols and treatment package ideas for your business.

DEMONSTRATION EVENTS

Let us show why Dermalux® has been voted Treatment of the Year with our free and no obligation demonstration events. This enables you to trial the Dermalux® treatment with your clients and discover more about the wide range of benefits for your business.

Testimonials

AESTHETIC DOCTOR

The Dermalux® LED system is an excellent standalone treatment and an invaluable addition to all the skin care programmes I offer in my clinic. It is probably the best investment in technology I have ever made.

Dr Simon Ravichandran, Clinetix

SKIN CARE SPECIALIST

Dermalux® is without doubt the best investment I have ever made. The treatment is so popular it now accounts for 40% of my business.

Karen Kroese, Kalista Beauty

LUXURY SPA

Dermalux® has enhanced our facial treatments and increased the Spa rebooking by helping us to sell treatment courses. I would recommend Dermalux® to any Spa who wants the best results for their clients.

Shelley Hepburn, Spa Director, Bulgari Hotel & Residences London

AESTHETIC NURSE

Incorporating Dermalux® has enabled us to offer treatment for a wider range of skin conditions. Our patients love it for rejuvenation, or post procedure to calm the skin and it enables us to treat acne, rosacea and sensitive skin knowing that they will see great results.

Sharon Bennett RGN NIP, Harrogate Aesthetics

AESTHETIC DOCTOR

I am thrilled with my Dermalux®. I have never purchased a machine that has been used as frequently from the first day of delivery, and have had very positive feedback from patients.

Dr Cheralyn Lumley, Lumley Aesthetics
